Statistical Notes:

Investment Restrictions - QEPs Only: A Qualified Eligible Person must meet the following two requirements: 1) the investor must first be an accredited investor. The most common ways for this are to either have a net worth of \$1,000,000 or more OR an annual income of \$200,000 or more for the last two years OR, combined with a spouse, \$300,000 per year for two years, 2) the investor must meet an additional portfolio requirement, which is having \$4,000,000 in securities holdings OR \$400,000 in margin on deposit with a Futures Commission Merchant OR a combination of the two (for example, \$2,000,000 in securities and \$200,000 in margin).

Compound ROR: The Annualized Compounded Rate of Return represents the compounded rate of return for each year or portion thereof presented. It is computed by applying successively respective monthly rate of return for each month beginning with the first month of that period. It smoothes out returns by assuming constant growth.

Worst Drawdown: Represents the worst drawdown experience by a CTA over the Time Period of the Report.

Worst Drawdown from Inception: Represents the worst drawdown experience by a CTA from Inception

Risk Adjusted Statistics measure how much risk is involved in producing return. The Sharpe Ratio, Standard Deviation and Sortino Ratio are all risk adjusted measures.

The Sharpe Ratio has been calculated using a 1% Risk Free Rate of Return.

Downside Deviation & the Sortino Ratio have been calculated using a 5% Minimum Acceptable Rate of Return.
